COPYRIGHT STATEMENT

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted materials including foreign works under certain conditions. In addition, the United States extends protection to foreign works by means of various international conventions, bilateral agreements, and proclamations.

Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

The Columbia University Libraries reserve the right to refuse to accept a copying order if, in its judgement, fulfillment of the order would involve violation of the copyright law.

EXCERPTS FROM THE LAWS AND REGULATIONS RELATIVE TO THE MANUFACTURE, SALE, AND USE OF ALCOHOL FOR INDUSTRIAL PURPOSES

The act of June 7, 1906, provides—

That from and after January 1, 1907, domestic alcohol of such degree of proof as may be prescribed by the Commissioner of Internal Revenue, and approved by the Secretary of the Treasury, may be withdrawn from bond without the payment of internal-revenue tax, for use in the arts and industries and for fuel, light, and power, provided said alcohol shall have been mixed in the presence and under the direction of an authorized Government officer, after withdrawal from the distillery warehouse, with methyl alcohol or other denaturing material or materials, or admixture of the same, suitable to the use for which the alcohol is withdrawn, but which destroys its character as a beverage and renders it unfit for liquid medicinal purposes; such denaturing to be done upon the application of any registered distillery in denaturing bonded warehouses specially designated or set apart for denaturing purposes only, and under conditions prescribed by the Commissioner of Internal Revenue with the approval of the Secretary of the Treasury.

The character and quality of the said denaturing material and the conditions upon which said alcohol may be withdrawn free of tax shall be prescribed by the Commissioner of Internal Revenue, who shall, with the approval of the Secretary of the Treasury, make all necessary regulations for carrying into effect the provisions of this act.

* * * * * * *

The national prohibition act, Title III, section 13, provides—

SEC. 13. The Commissioner shall from time to time issue regulations respecting the establishment, bonding, and operation of industrial-alcohol plants, denaturing plants, and bonded warehouses authorized herein, and the distribution, sale, export, and use of alcohol which may be necessary, advisable, or proper, to secure the revenue, to prevent diversion of the alcohol to illegal uses, and to place the nonbeverage industry and other industries using such alcohol as a chemical raw material or for other lawful purposes upon the highest possible plane of scientific and commercial efficiency consistent with the interests of the Government, and which shall insure an ample supply of such alcohol and promote its use in scientific research and the development of fuels, dyes, and other lawful products.

[1] Gallons.
[2] Includes 269,307,755 pounds of corn, 62,075 pounds of malt, and 30,264,598 pounds of hydrol acids, used at chemical plants producing butyl alcohol, acetone and ethyl alcohol.
[3] Includes 32,342 gallons of molasses used at chemical plants producing butyl alcohol, acetone, and ethyl alcohol.
[4] Includes 51,095 pounds of figs, 6,622 pounds of candy, and 62 pounds of pumpkin seed.
[5] Includes 1,127 gallons of sirup.

NOTE.—The average yield of alcohol per gallon of molasses used during the fiscal year 1933, was approximately 0.8257 of a gallon. The average yield of alcohol per bushel of grain used was approximately 4.32 gallons.
